SUMMARY

Final-year Mechanical Engineering student at Yaşar University (expected graduation: June 2027) with hands-on experience in CAD design (Fusion 360, SolidWorks), time study and process analysis, and wind tunnel testing. Completed a production and quality engineering internship in the automotive sector. Seeking an internship in manufacturing, design, or R&D.

EXPERIENCE

Production & Quality Engineering Intern | Sismak Otomotiv, İzmir Aug 2025 – Sep 2025

- Conducted time studies on the production line, analyzed workflows, and presented efficiency recommendations to the engineering team.
- Analyzed assembly fixtures in SolidWorks and supported improvement proposals with technical documentation.
- Restructured parts lists in Excel to systematize the material tracking process.
- Worked across production, quality control, assembly, and engineering departments in a cross-functional environment.

ACADEMIC PROJECTS

F1 DRS Upper Wing - Aerodynamic Analysis | ME 3330 Fluid Mechanics Lab, Yaşar University 2025 – 2026

- Designed scaled 3D wing models of three NACA profiles in Fusion 360, sized to T-490 wind tunnel constraints with a calculated blockage ratio of 7%.
- 3D printed models using FDM and applied surface finishing with 800-grit wet sandpaper to improve flow quality.
- Measured lift (FL) and drag (FD) forces at multiple angles of attack in the T-490 open-circuit wind tunnel.
- Calculated lift and drag coefficients (CL, CD) and analyzed flow separation and vortex formation using smoke visualization.
- Compared the Strouhal number ($St \approx 0.2$) with the theoretical value and evaluated the three NACA profiles comparatively.

EDUCATION

B.Sc. Mechanical Engineering | Yaşar University, İzmir 2022 – Expected Jun 2027

Anatolian High School | Uğur Schools 2018 – 2022

TECHNICAL SKILLS

CAD & Simulation: Fusion 360 (Good), SolidWorks (Good), Ansys (Basic), Proteus (Basic)

Programming: MATLAB (Intermediate), Python (Basic)

Other: MS Excel (Good), Time Study, Process Analysis, Technical Reporting & Documentation, Wind Tunnel Testing, Aerodynamic Coefficient Calculation, 3D Printing & Surface Finishing

CERTIFICATIONS

- Ansys Analysis Training - Udemy
- SolidWorks Training - Udemy and internship
- Occupational Health and Safety - University and Udemy

LANGUAGES

English: B2 (Upper-Intermediate) | German: B1 (Intermediate)
